

DOOA, an inspiring brand, helps you enjoy aquatic plants more freely. Minimal and easy, and designed as a platform allowing everyone to nurture plants indoors. Feel closer to nature, and bring beauty into your life.

Have a fun with epiphytes and Neo Glass Air

# DOOA PALUDARIUM

Paludarium with DOOA is full-fledged, having aquatic plants and jungle plants in small aquarium tanks that can be simply placed on a desk. Let's create your own Paludarium with your favorite plants.

# What is DOOA's Paludarium?

## Use of terrestrial plants and aquatic plants

For Paludarium, plants that prefer humidity such as mosses, aquatic plants and tropical rainforest plants, are suitable.

## Planting and arranging by yourself

Plant various plants such as aquatic plants that spread sideways and plants that grow upwards with tweezers.

## Having a fun with small aquarium tanks

Neo Glass Air is a lineup of small aquarium tanks. Choose appropriate sizes that suit spaces where you want to place the aquarium tanks.

## Easy maintenance with mist spray

For the maintenance, see how dry it is and spray mist. Regularly spray some Wabi-Kusa Mist on leaf surfaces and supply nutrients to aquatic plants.

# How do I create a Paludarium?

### 1. Creating a composition

Create a structure with natural materials such as stones and driftwood after laying substrate materials. Horn Wood S and SS are recommended to use.

### 2. Planting

Plant plants such as BIO Mizukusa no Mori using tweezers. Plant short plants in the front and plants that grow tall in the back.

Access this QR code for more information on the detailed methods.

## Products needed to create Paludarium

There are ideal tools for arranging and growing layouts.

Neo Glass Air  
W20×D20×H20(cm)

Neo Glass Cover  
20×20(cm)

Jungle Soil  
700mL

Jungle Base  
200mL

Terra Line

Terra Tape

Aqua Pincette M

Wabi-Kusa Mist  
200mL

## Plant lineup suitable for Paludarium

There are so many plants full of characters that vigorously grow in a humid environment.

BIO Mizukusa no Mori

Jungle Plants

*Tonina fluviatilis*

### Jungle Plants (epiphytic orchids)

*Epidendrum porpax* / *Mediocalcar decoratum* 'Orange' / *Maxillaria sophronitis* / *Ceratostylis philippinensis* / *Dinema polybulbon*

# Points for Growing Paludarium

## Point 1 Light

Avoid direct sunlight and place your aquarium tank in a bright place. The ideal place is where sunlight shines through curtains.  
※5000Lux or more is recommended.

## Point 2 Humidity

See how dry the aquarium tank is and spray mist. When the inside becomes stuffy, slightly slide the special glass cover and make a gap.

## Point 3 Air Breeze

It is necessary for epiphytic orchids to be in a dry environment from time to time. Attach them to the top of driftwood, adjust the gap of the special glass cover and create an ideal environment.
