In the DOOA brand, there is a full lineup of products to enjoy Terra Base. Because DOOA is unified with the simple and stylish designs, it is suitable for any room and enhances the true charms of plants inside an aquarium tank.

DOOA, an inspiring brand, helps you enjoy aquatic plants more freely. Minimal and easy, and designed as a platform allowing everyone to nurture plants indoors. Feel closer to nature, and bring beauty into your life.

New way to enjoy plants

TERRA BASE

Terra Base is an item that has been developed for growing and enjoying small orchids and ferns on tree trunks in tropical cloud forests in a way that is close to their natural states.

With the ceramic Terra Base, when the water seeped in the main body evaporates, the surface temperature of Terra Base decreases due to the heat of vaporization, and it is designed to curb the temperature rise. It effectively works for epiphytes that are intolerant to the temperature rise in summer.

Steps to enjoy Terra Base

First, thinly attach some aquatic moss on Terra Base and firmly wrap with Terra Line. Next, fix epiphytes such as small orchids and ferns on the Terra Base. While considering the overall balance, place them as accents. Epiphytic orchids should be placed on the top part which tends to get dry, and aquatic plants such as Anubias should be placed on the bottom part where the humidity tends to be high.

Details on creation processes and maintenance methods can be accessed from the QR code.

Recommended Plants to be enjoyed with Terra Base

● = Amphibious Plants ○ = Terrestrial Plants

All small epiphytic flowering orchids are unique and full of charms. Besides the flowers, leaves, bulbs and healthily grown roots are also the points to be appreciated. Give it a try creating a tree trunk as you like by combining with aquatic plants and ferns.

Terra Base Related Goods

Terra Base
There are 3 sizes in the lineup. Because of the cylindrical shape, it can be enjoyed no matter what angle you look at it from. It takes about a week for the water in the cylinder to gradually seep out, and sufficient water is supplied to the plants because the surface is moistened.

S : Ø10×H16 (cm)
M : Ø10×H23 (cm)
L : Ø11.6×H28 (cm)

Neo Glass Air
It is a decorative aquarium tank with highly transparent glass. By using it with a designated glass cover, a humid space suitable for plants can be prepared. Compatible sizes for each Terra Base are the following 3 sizes.

W20×D20×H30 (cm)
W20×D20×H35 (cm)
W30×D30×H45 (cm)

Terra Line
When winding Terra Line on Terra Base, the green colored line is assimilated with moss and becomes unnoticeable. Because of the insolubility, it can be used for fixing slow epiphytic orchids and ferns as well.

ADA Living Products
In different product types such as Wabi-Kusa Mat, BIO Mizukusa no Mori, Jungle Plants and so on, various products are available to enjoy attaching onto Terra Base.

Wabi-Kusa Mist
Besides the nutrients essential for the growth of plants, natural ingredients effective as pest repellent are also contained. With the spray nozzle, it can be immediately used.

200mL

Neo Glass Paluda 60
It is an easy to maintain front opening paludarium cage. 3 Terra Bases can be displayed. In order to keep high humidity inside the cage, Sphagnum should be laid.

W60×D30×H45 (cm)

Paluda Light 60
It is a lighting equipment developed for the purpose of viewing and growing tropical plants. The well-balanced RGB lights with the unique light adjustment create an ambiance of a forest bed.

Examples of Neo Glass Style

Neo Glass Air W20×D20×H35 (cm) Neo Glass Air W20×D20×H30 (cm) Neo Glass Air W15×D15×H25 (cm)

Terra Plate / Terra Plate Hook
The same material as Terra Base is used for the ceramic plate, and it is excellent at adjusting humidity. When it is hooked on Neo Glass Air with a designated hook, epiphytes can be easily enjoyed.

※If not used with lighting equipment, place the Neo Glass Air away from direct sunlight in a bright place.
