

ADA NATURE AQUARIUM METAL CABINET 60

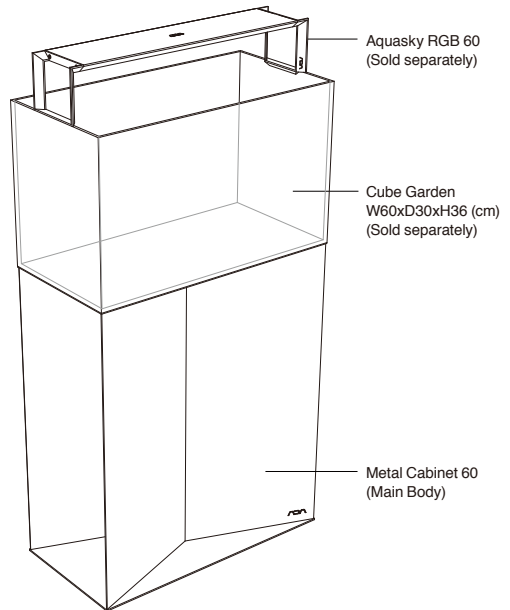

English

● Safety Instruction

- Install Metal Cabinet 60 on a level surface according to this manual and check the level after placing an aquarium tank on it. For your safety, an aquarium tank must be level.
- Placing Garden Mat on Metal Cabinet 60 underneath an aquarium tank (Cube Garden, Neo Glass Series.) is recommended. Because the Garden Mat effectively absorbs vibration and prevents an aquarium tank from sliding down, this product can be used even more safely.
- Make sure that there is no foreign material such as gravels and sands between Metal Cabinet 60 and an aquarium tank. If any foreign material is caught, there is a risk that an aquarium tank may crack.
- To prevent an aquarium tank from falling down, keep out of reach of children.
- When Metal Cabinet 60 is wet with water, immediately wipe it off with a dry towel. And when wiping off dirt, do not use any detergent to avoid the paint from coming off, but gently wipe off with a dry towel or a damp towel after wringing it out.
- Do not use this product outdoors because it may cause corrosion and rust, and the durability may be reduced.
- Do not climb up or sit on this product. (This product could be damaged and fall down. And it may result in personal injury.)
- Do not alter this product and use it forcibly in unreasonable ways.
- Freshwater Aquarium Use Only
- KEEP OUT OF REACH OF CHILDREN

● Installation method

- Make sure to install Metal Cabinet 60 on a flat floor surface. Do not install this product on unstable places such as a Tatami mat or a carpet.
- After placing Metal Cabinet 60 on the floor, gently push down the 4 corners of the top plate with hands and make sure it is not wobbly.
- After installing Metal Cabinet 60 and placing an aquarium tank on it, check the level with a level. And check the level after putting water in the aquarium tank.
- When installing Metal Cabinet 60, if it is wobbly or it is not level, shim a piece of wooden board cut in 5cm square between the floor and the Metal Cabinet 60 and adjust it. Prepare relatively thin wooden boards and adjust the inclination by number of wooden board layers.
- Install the main body according to the installation drawings. Place an aquarium tank on the main body, and then install lighting equipments such as Aquasky RGB 60. (The aquarium tank and the lighting equipment are sold separately.)

※Metal Cabinet 60 is designed for W60xD30xH36 aquarium tanks.

※Use Solar RGB Stand for Metal Cabinet 60 (sold separately) when installing Solar RGB (sold separately).

※Fix the mounting bracket to screw holes on the back of the right side with screws.
